Stripe | Software Engineering Intern (Product Platform)

Jan 2020 - Apr 2020

- Working on platformizing Stripe's Legal Compliance infrastructure.
- Designing APIs and abstractions to make it easy for product teams to launch new financial products globally while being compliant with local regulations.

Twitter | Software Engineering Intern (Data Infrastructure)

May 2019 - Aug 2019

- Added support for *end-to-end exactly-once processing* semantics in [Apache Heron](#) by implementing a variant of the two-phase commit algorithm. Details in [design doc](#).
- Designed and implemented a system (in Scala) that made Twitter's interactive query infrastructure (Presto and Hive) GDPR-compliant.

PlanGrid | Software Engineering Intern (Cloud Infrastructure)

Sep 2018 - Dec 2018

- Implemented centralized authentication and path-based routing in PlanGrid's Kubernetes cluster using Envoy and Istio. This greatly improved developer productivity.
- Built Spinnaker pipelines to allow *phased rollout* for ingress-related infrastructure changes.

DataDog | Software Engineering Intern (Metrics Ingestion Pipeline)

Jan 2018 - Apr 2018

- Worked on the metrics submission pipeline that streams millions of data points per second.
- Owned the time-series metadata creation service, written in Go, by ensuring its availability.
- Migrated the service's IPC layer to gRPC to improve reliability. Implemented consistent hashing and request termination, details in [blog post](#).

Universe | Software Engineering Intern (Product)

May 2017 - Aug 2017

- Developed many business-critical, A/B-tested, user-facing features using React and Rails.

Plotly | Software Engineering Intern (Product)

May 2016 - Aug 2016

- Maintained and developed features for [a feature-rich plot editor](#) built with React and Redux.

Writings

- [My one-liner Dropbox client](#) (**HackerNews front-paged**)
- [Lessons learned from writing a text editor in C](#) (**HackerNews front-paged**)
- [How gRPC helps improve reliability and fault tolerance at DataDog](#)

Education

University of Waterloo Bachelor of Software Engineering

Sep 2016 - Dec 2020 (expected)

90.3% cumulative GPA, *Dean's Honours List*
